# Holmes' OHIO SEED CORN

Wonder 255 Here is indeed a wonderful Corn. We think it is the grandest corn ever produced. Big ears, long, 18 to 22 rows of deep grain. The foliage is very dark green, and retains this color when the ears ripen. As to heat and drought resistance, it is not surpassed by any other. It's borer resistant. Its strong stalk and good roots make it stand best of all. It is adapted to a wide range of soils from poor to high and for northern states where yields have been consistently very high. Matures medium early, 100 days. We highly recommend that you grow a crop of this our Wonder 255. Large flat kernels.

Bu., \$10.00; 2 bus., \$19.50

of a beautiful golden yellow color. It produces a crop of the most perfectly uniform ears and has averaged 70 bushels of shelled Corn per acre. Holmes' Early matures in 90 to 100 days. The ears are 10 inches long with 14·16 rows of long, broad grains. The stalks grow from 8 to 10 feet high, giving an immense quantity of fodder. Farmers who planted Holmes' Early 90·Day for their main crop told us they grew one of the finest crops and best quality Corn.

Not a Hybrid Corn: 2 lbs., 70c; pk. (14 lbs.), \$2.00, postpaid. Not paid, bu., \$6.00; bag (2 bus.), \$11.50

U.S. 13

The most grown full-season hybrid yet developed. Strong stalk and roots, resists disease and insects and has high general vigor and wide adaptation for production of both grain and ensilage. On the average U. S. 13 outyields all competing varieties. Bu., \$9.00; 2 bus., \$17.50

The outstanding hybrid yet developed for midseason grain production. Stiff stalk, strong roots, good resistance to disease and insects. Ear medium sized with deep, smooth kernels. It dries out quickly in the fall and husks clean and easily by hand or with mechanical pickers. Yield is tops in its season.

Bu. \$10.00; 2 bus., \$19.50

This hybrid is making a reputation for itself all over Ohio. The plant is a very stiff-stalked kind which is most resistant to root lodging. Ohio W64 has shown excellent resistance to both Corn borer and blight. It is worthy of all the dependence you care to put in it, produces results.

Bu. \$10.00; 2 bus., \$19.50

# OHIO HYBRID K62 CORN BORER AND BLIGHT RESISTANT

This is one of the new early hybrids which has out-yielded most other kinds in its maturity class. It matures earlier and has outyielded K24 by 5 or 6 bu. per acre. In addition it carries less moisture at harvest time. It will stand well even late into the fall. It is resistant to both leaf blight and corn borer. This promises to be the best, highest yielding early hybrid Ohio has yet introduced. The seed is hard to produce and thus the higher price. The increase in yield and resistance to disease is worth many dollars to you.

Bu. \$10.00; 2 bus., \$19.50

CERTIFIED SEED is checked in the field and in the bin for purity and quality. The cost of quality seed is very small compared to increased yields. Don't take chances with unknown seed.
